

Putting Technology to work

Pipeline Technology Services was the first of its kind in South Australia and remains the leader in pipeline emergency, maintenance and repair services.

We pride ourselves on utilising and implementing best practices to exceed customer expectations by providing economic and environmentally sound service and solutions.

Our out-of-the-square attitude assists our clients to solve their pipeline problems.

We clean, evaluate and repair all facets of drainage and water mains, from large bore sewer and storm water drainage to domestic house drains.

Pipeline Technology Services have the philosophy that rehabilitation of existing drainage is a superior option not only in cost effectiveness, but as importantly in environmental and social impacts.

Pipeline Technology operates to anywhere in Australia from our head office in Adelaide, SA.

We currently have clients in regional, remote and national areas in many sectors.

We have designed and run our own rigorous in-house training for all of our technicians including the maintenance and servicing of the equipment. This ensures our highly specialised equipment is not out of action for lengthy repairs and maintenance.

Our technicians are trained in correct manual handling and certified in traffic management and confined space entry to ensure safe and efficient work practices.

They have completed training in the handling and transportation of waste and carry appropriate personal protective equipment for all situations.

Our vehicles are EPA licensed to transport hazardous waste.
