

Pipeline Technology Services was the first of its kind in South Australia and remains the leader in leading edge technology for pipeline emergency, maintenance and repair services.

We pride ourselves on utilising and implementing best practices to exceed customer expectations by providing economic and environmentally sound service and solutions.

Our out-of-the-square attitude assists our clients to solve their pipeline problems.

We clean, evaluate and repair all facets of drainage and water mains, from large bore sewer and storm water drainage to domestic house drains.

Pipeline Technology operates from our head office in Adelaide, SA to anywhere in Australia.

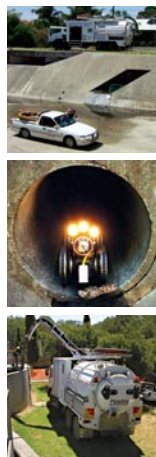

Our current clients in regional, remote and national areas represent all major sectors, including:

- Commercial
- Education
- Health
- Retail
- Industrial
- Transport/Infrastructure
- Mining
- Government
- Residential
- Cultural & recreational
- Agricultural and other

Please contact us for advice on your particular situation and/or reference from our clients.

We will always consider your problem as particular to you and offer the most economical and environmentally sound solution. We are unique in the pipeline business by being able to offer a full service where required with our construction and service plumbing divisions.
