

## LEAK DETECTION

Unidentified, buried or enclosed pipe leaks can cause extensive property damage and high costs in water usage.

Leaks are usually found to be underground, under concrete and within building structures.

We have invested in state-of-the-art technology to provide a leak location service.

This is a listening device with associated technical equipment by which our highly trained and skilled technicians are able to trace leaking underground pipe work.

This service reduces the guess work of sourcing underground leaks and helps to reduce the cost of repairs by establishing more clearly where the leak is rather than by extensive excavation or demolition.

*putting technology to work*

- Trenchless Technology
- Pipe Rehabilitation & Re-lining
- Sewer and Stormwater Cleaning
- Hydrojet & Vacuum Recovery Units
- Confined Space Entry Specialists
- Location of underground services
- CCTV inspections
